GENERAL VIEW OF THE CITY OF HAVANA.

favorably with the most famous in the lous with ships from almost every Nation on earth. The one idea it impresses is that of activity. European and American mail steamers come and go daily. Coasting steamers and the boats of the regular lines from Mexico and the islands of the Carribean seek the bay, and great ferries ply between the docks of the city and the Relga shores. There is also a fleet of sailing boats, yachts gathered from all over the world, row boats, and what not in the seaway.

The city itself is pleasing or irritating to the newcomer according to the spirit that may possess him at the time of his arrival. But all travelers agree on one point - they universally declare it to be one of the noisies, liveliest, pell-mell, happy-go-lucky, wide awake, clamorous, clangerous towns in existence. The great Humboldt said of it as he entered it from the bay that it was the gayest and most picturesque

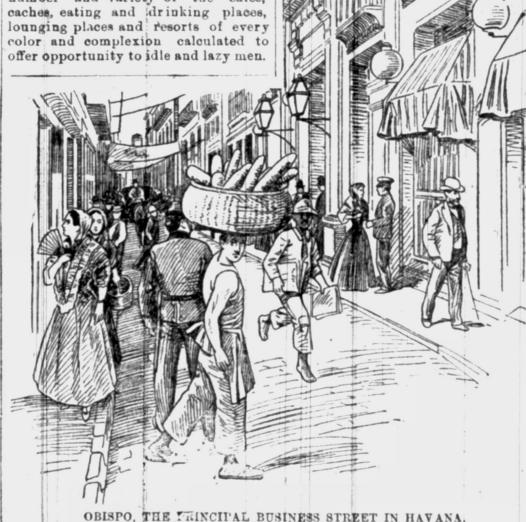

sight in all America.

It is certainly not American, and yet there is nothing like it in Europe. It is intensely Cuban, and a type of itself. In a general view the town presents churches, cathedrals and other structures that force themselves into prominence against the background of less imposing houses. There is nothing in this great extent of public buildings that strikes one as being specially A recent visitor to the island, describbeauty would be entirely subordina-ted by a colossal prison near the shore, which was built for the purpose of having a capacity to lodge with ease a matter of 5000 prisoners at a time.

called the intramural, or old town, site of the ancient walls which have fallen into decay and have been used for an upbuilding of the new city, and the extramural town, consisting of the new city, which lies beyond the site of the old walls and is more or less modern in its architecture. The are narrow in the extreme, with sidecity, although laid only in macadam, are wider, airier and fringed on either side with pretty palm trees, giving the town a garden-like aspect.

fleet could be held out of the bay. The which the town is overstocked for castle is re-enforced by the long range gambling purposes; the rattle of inof cannon and barracks on the city numerable cabs and public conveyside, and the massive fortress of the lances, the clangor of gongs on street Cubanos crowning the hill behind the car lines, electric and otherwise, and Morro. All these are decorated with the general roar to which every the red and yellow flag of Spain. So waking Havanese adds his mite, and many strong fortifications show how the city, even in the time of most important the home government re-slumbrous peace, can well be supposed to surpass any other town of 300,000 The harbor of Havana compares population in the world.

The populace of Havana, at least in world. Infinitely more picturesque times of peace—and this accounts for than New York Bay, it is much live its disquietude in times of war - is eslier in maritime interest than that of sentially gay. This accounts for the the Golden Gate. The bay is shaped number and variety of the cafes, like a human hand outstretched, with caches, eating and drinking places, the wrist as the entrance. It is populounging places and resorts of every color and complexion calculated to

valuable from an architectural point ing the habits of the men and their of view, and even if there were its unspeakable indolence, says this of the town's resorts and their habitues:

"The men luxuriste in the cafes or spend their evenings in worse places. A brief period of the morning only is given to business, the rest of the day The city is divided into two parts, and night to meeting and lassitude, smoking and luxurious ease. Evidences which lies between the bay and the of satisty, languor and duliness, the weakened capacity for enjoyment, are sadly conspicuous, the inevitable sequence of indolence and vice. The arts and sciences seldom disturb the thoughts of such people.

"The pretentious town house is side by side with the humble quarters of streets of the old town are laid put in the artisan. High life and low life are fairly regular order, and are pretty ever present in strong contrast, and in well paved. But these thoroughfares the best of humor with each other, affording elements of the picturesque, walks barely wide enough for one if not of the beautiful. Neatness must pedestrian. The streets of the new be ignored where such human conglomeration exists, and, as we all know, at certain seasons of the year. like dear, delightful, dirty Naples, Havana is the hotbed of pestilence. The architecture of the dwelling. The dryness of the atmosphere trans-

GAMECOCK SOLD FOR \$1000.

A Remarkable Transaction at an English Poultry Show.

A man in England paid \$1000 for a chicken a short time ago, although the fact is not a basis for speculation as to English poultry market prices.

THE GAMECOCK THAT COST \$1000.

ered so outrageous, even for a game cock, that the story of the sale when tions. it first began to circulate found few believers. But it was a genuine sale. The money was paid and the chicken

It was at the Birmingham poultry show a few weeks ago that this remarkable transaction took place. The gamecock in question, a fine black red, is said to be one of the most perfect of its kind in existence. It has a wonderful reach, is almost perfect in shape and size, while its fine tail is one of its best points. It has a fine ancestral record of prizes and triumphs, and is heavy winner itself. The owner of the bird was Mr. Hugh Ainscough, and the purchaser was Captain Heaton, agent of the Earl of Ellesmere.

New Picture of Washington.

Collectors of Washingtoniana will be interested to learn that a hitherto unknown engraving of the Father of his Country has recently been discovered. It is not mentioned in W. S. Baker's "Engraved Portraits of Washington," which is the standard work on the subject. But Mr. Baker has recognized it as a valuable addendum to the contemporary portraits of our first President.

The engraving in question, according to the legend thereon, was "Pubd. 15th July, 1784, by Whitworth & Yates, Birmingham." These English engravers are well known as the publishers of other valuable prints of the same subject. It shows Washington in his early manhood and differs considerably from the more familiar portraits which limp him at a ma-

WASHINGTON LETTER BOSTON WHOLESALE MARKETS.

SPECIAL CORRESPONDENCE.]

Hobson's Choice - Senators Hoar and Lodge have showed great irritation in the Senate over the "warnings" of "good and well-meaning people" that the Senate must toe the scratch and ratify the arbitration trenty. They object, it appears, to having spurs jammed into them if the treaty be not taken up, considered and disposed of within 24 hours. This is "atter folly," a "premature agitation," says Mr. Hoar, whose mail is probably well stacked with "warnings" every day. The public feeling may de Jane. The Casino is a place of Even the very children on the street be illustrated by a story about Dean amusement and instruction combined, recognize you. The boatman charges Richmond. When it was proposed to a sort of atheneum, in which such art you 50 cents, when the ordinary price him once to experiment in the paintmerchandise rise alarmingly when the cars, he said: "You can paint them cars any dam color you like so long as you paint 'em red." The Senate can act as it likes so long as it ratifies the

HAVERHILL'S POSTMASTER - E. B. George and Moses Dow or Haverhill, have just been here and had conferences with Senators Hoar and Lodge, and also with Representative Moody, whose home is in Haverhill, in regard to the confirmation of Mr. Winn, who has been appointed postmaster at that city. There has been a strong effort made to defeat the confirmation of Mr. Winn, so that after March 4 a republican may be appointed to the office. Mesark George and Dow appeared with letters from nearly all the prominent republicans of Haverhill, urging the senators from Massachusetts to secure Mr. Winn's confirmation.

To DEFEAT LONG-The arrival in Washington of Ex-Gov. Cheney of New Hampshire and Stephen M. Weld of Boston, after a conference with President-elect McKinley in the interest of T. Jefferson Coolidge's ambition to have a place in the next cabinet, served to make a good deal of talk about the ex-minister to France at the expense of ex-Gov. Long. It is asserted that Senators Hoar and Lodge prefer Coolidge to Long and are actively at work to make their wishes effective. They are said to have brought the New England senators to the support of their man. This is interesting, although it may not be important in the end. It serves to show that the purposes of our senators have been crossed and that the rise of Long has been anything but agreeable.

FAREWELL RECEPTION-Mrs. Cleve. land's tea on Saturday was in the naas crowded as any of the public receptions. The company was entirely of ladies, the only men present being Col. John M. Wilson and Lieut Days er, U.S. A., who made the introduc-

CHAPTER ADDED - Another chapter has been added to the Delaware senatorial contest. Senator Burrows of Michigan has presented in the Senate a memorial or petition signed by the three McKinley electors from the state

-Messrs. Shaw, Wilson and Forbesintended to demonstrate that Delaware does not enjoy a republican form of government. This allegation is based on the frauds which the republicans claim were perpetrated by the democrats in Kent county. The petition is plainly intended to form an important part of the evidence in the contest of Mr. Edward Addicks, Boston's ex-gas magnate for a seat in the Senate. Senator Gray says the petition is not worthy of serious attention, and will have no effect. He feels that little if any doubt exists that Mr. Kinney will be seated, nor does he think Mr. Kinney can be long kept out of his seat by dilatory tactics.

GIVEN ANOTHER CHANCE-Gen. Fitzhugh Lee's son has been given another chance to wear the epaulets, owing to the good offices of Representative Tucker of Virginia, who has reappointed him as a cadet in the United States Military academy, with the assent of the Academy board. This was the only practicable manner of continuing him in the army.

TREASURY STATEMENT-The gold reserve gained another notch on Saturday, rising to \$143,182,755, an increase of \$371,637 for the day. The receipts showed an excess of \$625,862 over the expenditures. It must be admitted that this excess on the right side is due, however, not to an enlargement of the receipts, but to the light disbursements for expenditures. The steady increase in the reserve is gratifying, for it shows that the restoration of public confidence is finding fuller development every day. The public seems to have got back to the old feeling which prevailed before the reserve had been permitted to fall below the \$100,000,000 line. In those days the people preferred greenbacks to gold, and marked their preference by sending the yellow metal to the treasury and taking out government notes in its place. Their choice was justifiable at that time, and is as wisely directed at present.

WILL BE RETIRED-Chief Engineer George E. Tower, U. S. N., has been recommended for retirement. His last duty was as chief engineer of the battleship Indiana, but he remained there only a short time, as he and one of his assistants broke down during the maneuvres of the North Atlantic squadron last August, and he has been nuder treatment in one of the naval hospitals ever since.

WILL BEAR FRUIT .- The 22d annual session of the National Association of Marine Engineers has just been held here. President Uhler, Secreing the meeting will bear fruit in legislation important to engineers and assistants throughout the country.

Cut loaf and crushed, 5c: pulverized, 4%c: powdered, 4%c: cube, 4%c: granulated, 4%c: granulated, at retail, 5c: diamond is, 4%c; bag yellow, 3%c3.8ic; Ontario, As, 4%c

To make the appended quotations of value alike to buyer and seller, the resume of the market, prefacing the quotations, should be carefully read. In a market of this character it is impossible to give prices for every day of the week. Noting, however, the general tendency of trade, sufficiently accurate quotations will be given on which dealers can safely base their transactions.

Flour and wheat are slow and the market has declined since last quotations. Corn remains firm, and oats have changed little in price. The lower grades of butter are lower in price. Eggs are in good demand. Game is commanding an excellent price and finding a ready market. The receipts in granges are large, and the variety and quality are good. The prices in garden truck have not materially changed.

FLOUR-The movement in flour continues slow with prices quoted lower, in sympathy. with the declining wheat.

Spring patents, \$4 50 @4.75; Spring, clear and straight, \$360@4 35; Winter, clear and straight, \$440@4 70; Winter patents, \$485

These are mill prices for car lots. Jobs

GRAHAMFLOUR Trade rules quiet, with the market easier at \$2.90 to 4.80 per bbl.

CORN-Trade continues quiet with prices quoted firm to ship.

Old steamer, yellow, spot, 33c; new, corn spot 30% 31 c: No. 2 yellow, to ship, 33c; new yellow, to ship, 30 @31-20.

CORN MEAL -- The market is quiet at 58

@ 60c per bag, and \$1 35@ 1 40 per bbl. Granulated, \$1 80@2 10 per bbl. OATS-The demand is quiet with prices

not materially changed on spot and to arrive. Clipped, old, on spot, 26 .@271 e: fancy new clipped on spot. 25@26: higher rejec ted white, spot, 24%24 er clipped, to ship, new, 23126c25 er fancy higher.

OATMEAL -Quiet and lower at \$3 20@ 3 65 per bbl for ground and rolled, and #3 60 (a 4 05 for out.

MILL FEED-Trade is quiet, with prices lake and rail firm.

"SHE DRESSES WELL."

BUT HER CLOTHES OFTEN COVER A LIVING DEATH.

Beauty Is the Shrine of Men's Worship, and Women Vie With Each Other to Make Themselves Attractive.

The remark, "She dresses elegantly," is a very common one in this age of

wealth and progress. Women vie with each other in making themselves attractive, for men admire a stylishly

> dressed woman. Good clothes add to the charms of the woman in perfect health, but are ill-befitting those who

> > through ignorance or carel**essness** have suffered the inroads of female diseases to stamp them as physical wrecks. It is unfortunate, but true, that some physicians allow omen to suffer

needlessly, because man can only work from theory, and at best only patch up, without removing the cause.

Proof is abundant that Lydia E. Pinkham's Vegetable Compound removes the cause, gives strength to the weakened organs, vigorous health to the system, and therefore beauty to the face and form.

Mrs. Pinkham, Lynn, Mass., gladly answers, free of charge all letters. Here is one of the results:

"Three months ago, I wrote you a letter describing my troubles, which were inflammation of the womb and bladder. I had not seen a well day since the birth of my second child, 16 years ago. I had spent hundreds of dollars for doctors and medicines.

"Such pains as I endured. My back ached, my feet and limbs were swollen, and it was almost impossible for me to stand; I could not walk any distance. I received your answer to my letter, and followed closely all your advice, and I have been using Lydia E. Pinkham's Compound for three months. Now I can work all day without pain. I have recommended the Compound to many of my friends, and gladly recommend it to all women in any way afflicted with female troubles."-LYDIA BATIE, 227 Spring St., Greensburg, Pa

Ship Flops in Her Dock.

While she was lying at her pier in London a peculiar accident befell the steamship Orotava. She is a large passenger vessel which plies between London, the Orient and Australia, and had braved more than one simoon on the Indian Ocean. But in the peaceful waters of the Thames she flopped over as easily as a rowboat when everybody insists on standing on the gun-

She was being coaled at the time in the customary manner. The starboard side had listed a little because the coal had been placed on that side and none as yet had been placed on the port side. Suddenly the vessel gave a lurch to starboard, seeming to go over like a person losing his balance, and Some English and Irish members water began to rush in at the open of Parliament recently met to hear portholes. The officer in command ordered them to be closed with about Commission on the fluancial relations as much effect as King Canute's orderof Ireland with Great Britain. The ing the sea to retreat. The water was pouring in in a roaring torrent with irresistible force.

There were a great many workmen \$12.36 in 1894. The population, at work in the hold. They were startled by the lurch, and when the water had since constantly decreased from began to rush they scampered for the deck. Some were in the ballast tanks lions. The total taxation of Ireland giving them the regular cleaning that they must have after every voyage. Five of these were drowned, probably in a minute after the lurch, like rats in a hole. The cost of repairing the damage will be some \$50,000. The incident resembles in several respects the sinking of the battleship Texas, and shows how little, after all, it takes to sink a modern steamship, which can bear up against any sort of a tornado - New York Press.

The Cat Took the Pail.

Many milkmen in the lower section of the city serve their wares in small tin cans, which sre left upon the front doorsteps. Generally the lids of these cans are fastened down so tight that it requires a pretty hard tug to get them off On a recent morning, however, the can which was left at the door of a house on Watt street, below Ritner, had no lid at all. This oversight on the part of the milkman attracted a humeless cat, which had been prowling around all night. The cat sniffed about the can, and discovering that it was full of sweet milk speedily introduced her head into the can. It was a hard squeeze, and when she had drunk her fill she found it utterly impossible to withdraw her head. scratched and clawed, and finally dashed off down the street like mad just as the housewife appeared at the door to take in the family's milk. The cat hasn't been seen since, and the milkman has lost a brand-new can. -Philadelphia Record.

His Kindly Suggestion.

FASHION FADS.

NEW AND IMPORTANT DETAILS OF FEMININE DRESS.

Promenade Costume of Green Broadcloth Which is Fanciful in Design-Evening Wraps Trimmed With Fur.

N the double-column illustration a promenade costume is shown of green broadcloth trimmed with fancy black and gold braid; stylish bolero's opening upon a high corsage of black satin, above which is a vest of pretty plaided silk crossing diagonally over the bust, the right front overlapping the left and showing a tiny V-shade or enpiecement, also of black satin, corresponding with the close-standing band and fashionable Medici collar.

Although fanciful in design says May Manton, the bodice is simple in construction. The fronts are arranged over glove-fitting lining fronts, that close through the centre. The small V-shaped piece at the neck closes at the left side underneath the diagonally crossed vest, which also closes on the left side invisibly with the high

The back of the waist is also mounted upon a fitted lining; smooth underarm gores separating the fronts from the back. The bolero, stylishly pointed at the fronts, is provided with oblong fanciful revers. The sleeves. of modified dimensions, are completed at the wrists by overlapping pointed

The skirt fully emphasizes the latest

exceedingly effective and inexpensive, One exquisite model seen was of bengaline in deep dull red. The lining

was of maize brocade, showing a ground of the faintest shade of green interwoven with flowers in the same warm tint of red. The garment was cut in the three-quarter length.

To make this cloak for a lady in the medium size will require three and three-quarter yards of forty-four-inch wide material.

STYLISH SLEEVES.

Sleeves are one of the most iminnovation representing the new bell portant details of dress at present, the

skirt. It is cut with circular fronts and sides, while the back is gored and arranged at the top in plants turning towards the centre-back in fan shape. The lower edge has three rows of braid; similar braid being carried down the seams of the front gore to form deep pointed tabs. The free edges of the bolero and cuffs are also outlined with braid.

To make this waist for a lady in the medium size will require two and onehalf yards of forty-four-inch wide ma-

LADIES' LONG CLOAK.

An opera and concert wrap of amethyst satin-faced cloth, lined with chine silk and trimmed with white Thibet fur, is shown herewith. The garment, enveloping the entire figure, is circular in shape and has a centreback seam; it fits the figure smoothly at the top by means of the small darts on each shoulder, expanding below to fall in soft rippling flutes. A notice-able feature is the stylish hood of unique shaping that falls deeply across the back and shoulders. It is lined with chine silk and gathers at the outer edge to form a pretty frill. Its advantages are manifold, being useful as well as ornamental, as it can be thrown over the head when walking to or from the carriage, thus insuring protection from draughts.

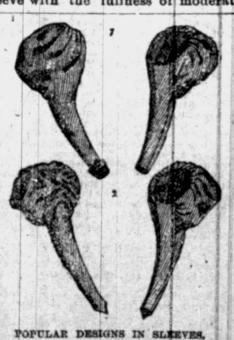

About the neck is a high flaring collar of the fur, its outer edge forming the fashionable flare according to the present mode. The closing may be effected invisibly through the centre-front with cloak books and loops, or the wrap thrown carelessly across the shoulders, displaying the handsome gown beneath. Perforated lines in our pattern give a choice to the wearer of either a three-quarter or full

length wrap.

The mode is adapted to cloth, velour, silk, satin, bengaline or brocade in evening tints, while ermine, moufflon or llama will serve as decoration. A pretty lining of bright-hued silk is almost indispensable. When a question of economy arises, however, the garment can be lined with merino, cashmere or albatross that can be had in exquisite shades of lilae, cornflower blue, green or pink. Dove-gray cashmere lined with rose-pink would be latest venture.

variation being more noticable in them than in any other part of the toilette. No. 1 is a popular design adapted to all manner of weaves and textures. In the present instance the muterial chosen was oris-purple cloth. The shaping is effected with smooth under and full upper portion over fitted linings, so arranged as to flare stylishly above the elbow, the adjustment below being close. The wrists, completed by a circular cuff, may be plainly finished if preferred.

No. 2, developed in petunia glace silk, presents a snug fit from above the elbow to the wrist, which has a point extending over the hand in Venetian style. The puff is a continustion of the upper portion of the sleeve with the fullness of moderate

dimension arranged on the front seam in deep plaits and on the back seam in close gathers. All seasonable fabrics will develop by either of these models. New sleeves in last year's bodice means a wonderful transformation. With the aid of a well-fitting pattern old-fashioned sleeves may be readily modified. To make these sleeves for a lady in the medium size it will require one and three eighths yards for No. 1 design, and one and ave-eighths vards for No. 2 design, of forty-four-

A hospital for jockeys is France's

ALWAYS BRINGS PROSPERITY TO THE WHOLE COUNTRY.

But a Free Teade Tariff Is Invariably Succeeded by Business Depression -Some Strong Testimony From

Some of the newspapers of this country seem to be about as unsettled in their opinious about the merits of protection and free trade as they were in the early history of the country. There are plenty of facts now to show that business prosperity has always improved when a protective tariff is in operation and that there has always been business depression under a revenue or free trade tariff. One of the most protective tariffs ever established was that of 1824 and 1828. That the country prospered under that tariff we have proof in the official statement of President Jackson in his message of December 4, 1832, in which we find the following:

"Our country presents on every side marks of prosperity and happiness unequaled, perhaps, in any other por-tion of the world. If we fully appreciate conditions, existing causes of discontent will appear unworthy of attention, and with hearts of thankfulness to that Divine Being who has filled our cup of prosperity we shall feel our resolutions strengthened to preserve and hand down to posterity that liberty and that union which we have received from our fathers and which constitutes the source and shield of all our blessings. The report which the Secretary of the Treasury will in due time lay before you will exhibit the national finances in a highly prosperous state.'

This message was sent to Congress just before the act of 1833 lowering the duties was passed. This act, together with the attack upon the United States Bank, resulted in the panic of 1837, one of the worst ever known in the country. The business of the country did not recover from that panic until the protective tariff of 1842, under Harrison and Tyler's administration, was established. In 1846, when this tariff was in full operation, President Polk in his message said:

"Since your last session no afflicting dispensation has visited our country. General good health has prevailed; abundance has crowned the toil of the husbandman; and labor in all its branches is receiving an ample reward, while education, science and the arts are rapidly enlarging the means of social happiness. The progress of our country in her career of greatness, not only in the vast extensions of our territorial limits and the rapid increase of our population, but in resources and wealth and in the happy condition of our people, is without an example in the history of nations."

In 1843, however, the Walker tariff bill, which materially lowered the rates of duties, became a law, and the result was depicted by President Fillmore, in 1854 as follows:

"The value of our exports of breadstuffs and provisions, which it was supposed the incentive of a low tariff and large imports from abroad would have greatly augmented, has fallen from \$68,701,921 in 1847 to \$25,051. 273 in 1850 and to \$21,848,653 in 1851, and with a strong probability, amounting almost to a certainty, of a still further reduction in the current

"The policy which dictated a low rate of duties on foreign merchandise. it was thought by those who prompted and established it, would tend to benefit the farming population of this country by increasing the demand and raising the price of agricultural products in foreign markets. The foregoing facts, however, seem to show incontestably that no such result has followed the adoption of this

"Without repeating the arguments contained in my former message in favor of discriminating duties, I deem it my duty to call your attention to one or two other considerations affecting this subject. The first is the effect of large importations of foreign goods upon our currency. Most of the gold of California, as fast as it is coined. finds its way directly to Europe in payment for goods purchased. In the second place, as our manufacturing establishments are broken down by competition with foreigners, the capi tal invested in them is lost, thousands of honest and influstrious citizens are thrown out of employment, and the farmer to that extent is deprived of a home market for the sale of his surplus product. In the third place, the destruction of our manufacturers leaves the foreigner without competition in our market and he consequently raises the price of the articles sent here for sale, as is now seen in the increased cost of iron imported from England."

And yet, notwithstanding this heavy depression in our business affairs, a still further reduction in the tariff was made, which culminated in the terrible panic of 1857, and the deplorable condition of the country between this time and 1860 was truthfully depicted by President Buchanan in his message of December 8, 1857, when he said :

"We have possessed all the elements of material wealth in rich abundance, and yet notwithstanding all these advantages our country in its monetary interest is at the present moment in a deplorable condition. In the midst of unsurpassed plenty in all the productions, and in all the elements of natural wealth, we find our manufactures suspended, our public works retarded, our private enterprises of different kinds abandoned, and thousands of useful laborers thrown out of employment

Then came our Civil War, with its terrible upheavals and overturnings, its necessities, is demands and its un-

tive tariff set every wheel in motion and favored the opening up of every industry. Our country's growth and prosperity were beyond the power of words to express. True, we suffered from the panic of 1873, due to lowering of the tariff and contraction of the currency, and from hard times in 1878, due to a similar cause, but as a whole the thirty years from 1852 to 1892 Eminent American Statesmen, were a period of protested industries and of unparalleled prosperity. On November 10, 1892, Governor Roswell P. Flower, of New York, made the following statement in his Thanksgiving proclamation:

"God has been merciful in sparing us from threatened disease, from civil disorder, from serious conflict between employers and employes, and from commercial and agricultural distress. Crops have been plentiful, business has been active, industry has been well rewarded, intelligence and learning have been more widely diffused, and contentment and happiness prevail generally within the borders of our commonwealth.'

President Harrison in his last message to Congress, on December 6, 1892, made the following statement:

"There has never been a time in our nistory when work was so abundant or when wages were so high, whether measured by the currency in which they were paid or by their power to supply the necessaries and comforts of

"The report of the Secretary of the Treasury will attract especial interest in view of the many misleading statements that have been made as to the state of the public revenues. Three preliminary facts should not only be stated, but emphasized, before looking to details: First, that the public debt has been reduced since March 4, 1889, \$259,074,200, and the annual interest charge \$11,684,496. Second, that there have been paid out for pensions during this administration, up to November 1, 1892, \$432,564,178.70, an excess of \$114,466,386.09 over the sum expended during the period from March 1, 1885, to March 1, 1889; and third. that under the existing tariff, up to December 1, about \$93,000,000 of revenue, which would have been collected upon imported sugars if the duty had been maintained has gone into the pockets of the people and not into the public Treasury, as before. . . .

"The revenues for the fiscal year ending June 40, 1892, from all sources, were \$425,868,260.22 and the expenditures for all purposes were \$413,-953,806.56, leaving a balance of \$9,-914,453.06. There was paid during the year upon the public debt \$40,-570, 467.89."

From all this testimony we cannot but deduce the following: That a protective tariff has invariably resulted in business prosperity and material growth, while a non-protective tariff has just as invariably resulted in business depression, hard times and general prostration:

Let us, however, bring the testimony up to the present time and note the contrast. President Harrison, under the protecting policy of the McKinley tariff, reduced the public debt \$259,074,200, and the annual interest \$11,684,496, while Mr. Cleveland, under his tariff reform policy, has added to the public debt \$262,000,000 of thirty-year bonds and over \$6,000,000 to the annual interest. During the last year of Mr. Harrison's administration, after paying \$40,570,453 on the public debt, and the largest amount of pension money ever paid in the history of the country, there was still a surplus of \$9,914,453 in the Treasury. while Mr. Cleveland, during his four years, has paid nothing on the public debt, has cut down the pensions some \$13,000,000, and will show a deficiency during the last year amounting to more than \$80,000,000; and for the three years 1894, '95, '96 the yearly average deficiency has amounted to \$49,154,342.

Now, what is the cause of the change? It is evidently due to a change of administration and a change of policy in regard to a protective tariff. The country was never in a more florishing condition than in 1892, during President Harrison's administration, and it was never in much worse condition than just previous to the election in November, 1896. Prosperity has been in a measure restored by the assurance that a party favoring protection is soon to be placed in power. Let Congress pass such tariff bills as the protectionists propose, and as will not only give a sufficient revenue to meet the Government expenses, but will also protect our industries. Then the prosperity of the people will be such that this country will flourish as it has never done be-

A club has just been organized at Vienna in which the occasionally delightful luxury of silence can be enjoyed whenever the members desire. This privilege is secured by a constitution which consists chiefly of a rule that under no pretext is a word to be spoken in any part of the club-house. All necessary communications, including the giving of orders to waiters, must be made in writing, and members are forbidden even by nodding to recognize each other's presence. For some unknown reason only married men are expected to join this club, according to the Vienna papers, but applications for membership are coming in rapidly.

DISEASES OF THE SHIN.

The intense itching and smarting incident to eczema, tetter, salt-rheum, and other diseases of the skin is instantly allayed by applying Chamberlain's Eye and Skin Ointment. Many very bad cases have been permanently cured by it. It is equally efficient for itching piles and a favorite remedy for sore nipples; chapped hands, chilblains, frost bites, and chronic sore eyes.

terrible upheavals and overturnings, its necessities, it demands and its un-heard of means of supply. A protec-

Protect the Home.

Another month and the often discussed question, "Shall licence for the sale of intoxicating liquors in this town be granted?" will be presented to our citizens.
For a decade that answer has been No! spoken through the ballot box with increasing emphasis, and the growth of this town since it was made apparent that this was the settled conviction of its citizens, is the strongest possible argument for not graduated. From Harvard University in graduated from Harvard University in the Artington Approate, now and for a long time one of the best and most prosperous news that two held our memory of its appearance between then cannow is very marked indeed. The hand now is very marked in feature of the celebration of the 25th anniversary of the establishment of the Artington Approach, now and for a long time one of the best and most prosperous news hand to make the new that two helds of the contrast in their appearance between then and now is very marked indeed. The hand now is very marked in feature of the celebration of the 25th anniversary of the establishment of the Artington Approach and the papers published near Boston, we not only the new that two helds of the contrast in their appearance between then some some source in the Artington Approach and the papers published near Boston, we not only the new that two helds of the contrast in their appearance between then contrast in their appearance between the some some source in the Artington Approach is a long time one of the best and most prosperous news that two helds of the contrast in their appearance between the news of the contrast in their appearance between the news of the contrast in their appearance between the news of the contrast in their appearance between the news of the contrast to the Artington Appearance in the Artington Appeara only continuing the policy, but backing it with a largely increased No vote.

No-Licence Committee and the pastors action will be arranged for and carried in this campaign, for we are certain that last year was an element of strength to ecutive ability and universally respected. which the increased vote for No was largely due. We need their enthusiasm, of such a heritage by standing ready for for six months. any duty, even to the extent of bearing the brunt of battle if need be.

It would be foolish to rely on past victories or to assume that the fight is bermanently won. The arch enemy of the home is ever alert, is argus eyed in discovering weak places in the lines of defence and is equipped with money and men to make the most of mistakes in lines of attack or defence. A word to the wise Belmont.

Mr. J. F. Trott is supt. of schools in Buffalo, and having received from Mr. J. S. LeBaron a copy of the ADVOCATE Souvenir, writes to him as follows:

"I am very much obliged to you for Mr. Parker's Souvenir to the people of Arlington. The whole thing speaks very handsomely for both party to the affair, and the paper itself is an excellent sample. A local paper has a character of itself. A city paper is overrun with all the excitements of life and one keeps in a breeze all the time; but a local paper gives all that one wants and enables one to rest and think, and really gives a better idea of what should be. You have a pretty, convenient town,a model, and Mr. Parker has done his share in making it all that could be asked.

Handsome invitations (printed at this office) have been issued for a select subscription dancing party which will take place in Town Hall, Arlington, on Friday, Feb. 19th. The party is given under the management of Miss Fannie E. Hoitt, Miss Julia A. Hartwell and Miss Ethel Homer, and their success in the past in this line assures a brilliant occasion on the occurrence of the coming party. The party will be matronized by Mrs. J. Q. A. Brackett, Mrs. Waterman A. Taft and Mrs. Harry G. Porter. Those minded that a prompt reply to the same will be appreciated.

The storm of last week covered a wide territory and was especially severe on the Atlantic. Incoming steamers tell of severe struggles and one veteran havigator reports the worst gale he has ever encountered. The cold wave incident to the storm spread as far south as Lake Helen, Florida, where most of the foliage not covered in consequence of the warning from the weather bureau, was nipped by the frost.

The State House at Harrisburg, Pa., was burned last Tuesday. The Capitol was built early in the century but was, nevertheless, regarded as one of the handsomest specimens of Ionic architecture in the country. The building was of red brick, with white trimmings, It was surrounded by a park of ten acres, and stood on an eminence almost in the centre of the cicy.

The charges sprung upon the country regarding Gen. Alger, prominently named for a place in Prest. McKinley's

unys ago uncommonly well because it showed us the difference between West Cambridge of 1842 and Arlington of 1872, and 1897. Many years before Mr. Charles S. Parker established the ARLANGTON ADVOCATE, now and for a long thing one of the best and provided the best and provided the long of t sary of the establishment of the ARLINGTON ADVOCATE by Mr. Charles S. Parker, now senmber of the firm of publishers, which fell last week, and it is in every respect worthy of the occasion. On Wednesday evening the citizens of Arlington paid editor C. S. Parker one of the highest compliments possible to bestow on a fellow citizen. They enmasse gave a brilon a fellow citizen. They enmasse gave a brilliant party in the Town House in honor of the 25th anniversary of the birth of the ADVOCATE, and high esteem for its founders. It originated with and was carried through by leading mem-hers of society, both male and female, and proved a signal success. A fine program was splendidly executed, and distinguished consideration was paid to Editor Parker as the leading man in the happy, festive affair. He richly deserved all the good things the great party said about and did for him.

Cambridge Press:-The publisher of the ARL-INGTON ADVOCATE celebrates the twenty fifth anniversary of the publication of that paper by VENIR." It is a work in every way worthy of the proprietor, Charles S. Parker. The principal events in the history of the town are given in a very concise and readable form, culled from the columns of the paper for the past quarter of a century. We know Mr. Parker well, and believe him to be a conscientious and reliable editor. Although his field of journalism has not been so large as many of the metropoli tan papers, yet he can look back on his work for the past twenty five years feeling that he has done his whole duty as an editor. Well done good and faithful brother journalist.

The banquet tendered to Mr. Parker, by the leading citizens of Arlington, on Wednesday evening, was a brilliant affair. It was presided

over by ex-Governor Brackett, who is a resident of the town. Among the editors present were Stephen O'Meara, of the Boston Journal, Hon, W. H. Cook, of the Milford Journal, and John L. Parker of the Lynn Daily Item. Wohnen News :- The ARLINGTON ADVOCATE

Chas, S. Pitrker & Son, proprietors and editors,) was 25 years old on Tuesday of this week, and tendered by the ciffzens of that town. Mr. John the ADVOCAEE, participated in the festivities. RECEIPT OF 15 CENTS, TO ANY ADDRESS

LAKE HELEN, FLA., Jan. 25, 1897. MESSRS. EDITORS:-Cold morning for Florida, -just 50 degrees at seven o'clock. A roaring Florida pine fire at my back in the office, gives me a warm reception. It is a melancholy pleasure to be "at home" once more in the "Harlan." A pleasure, because Florida is charming to tieth Century Renaissance-full of humerous sit me,-melancholy, because of the eternal absence from these haunts of those who once added to its pleasure. In looking over the "Register" I found Mr. Cyrus Wood's name as at the closing of the house in the spring and at the opening, the next first day of the season. Hillman, of New York, the Westcotts of Asbury Park, were also of the first to come and the last to go. They were people who had travelled much, but gave this spot and this home their preference. Here are the stately, graceful "Southern Pines" in a the stately, graceful "Southern Pines" in their perfection, never quiet, their tops like trated—the result of a recent visit to Mexico undertaken for HARPER'S MAGAZINE. Mex waving hands or fleecy clouds, seem beckoning and inviting your attention; the air is heavy with their resinous fragrance.

restful, provocative of the Spaniard's climate, the roses, the jasmine sweet and delicious are here, but the orange trees, the living cones of green and gold and white, have for a time departed. Oh, that "cruel winter" of '94 and '95! Longfellow's vision did not compare with this upbuilding of the beautiful town whose historic soil contributes its fraternal fringe to Somerreality. Kind nature is doing her best to right the great wrong of disaster, the ville's western boundary and the silver anni versary of the handsome journal he so ably conlike of which never fell on any other ducts was made a matter not only of personal but of municipal congratulation, with a banquet state in this nation. A living fagot of sprouts, from three to twenty feet high, in the Town Hall and speeches from distinis taking the place of the killed tree. Alguished gentlemen, ranging from an ex-gover nor to one of the most honored newspape managers of Boston. Effitor, Parker, on th ready a few oranges have been gathered other hand, repaid this courtesy with a supurb souvenir edition of his paper. To say that our congratulations go out to brother Parker is needless; it is the people whom he has served from the groves which yielded between five and six million boxes in 1894.

If any spot on earth can be called quiet,

A braver, more hopeful people cannot be found than these who have made Florida their new home. Not one year's crop did they lose, but also their trees, the growth of years, and that will require years of toil and patience and expense to re-establish. The amount of sacrifice that some of them exercise is praiseworthy. Working in summer for twenty-five cents a day, in order to remain here and build up their struggling pets; for one learns to love as a child, these beautiful fragrant creations. Have you ever heard of a petition to Congress for the relief of Florida's stricken people, or an appeal to state or church in their behalf? But their affliction was enduring, as is their hope and trust in their climate and calling and location.

About a mile from where I sit, the Concannons are building up their home of the credulous. On a beautiful rolling tract of lovely pines, overlooking two lakes, they have a flourishing settlement of spirits and mediums and victims.

Flagler's enterprise is still pushing on toward the south. Rail and mammoth hotels keep pace with each other, but track and service are so "oiled" that all goes smoothly. Daily trains, heavy with visitors, seek his "ultima thule." Such men as he are at once pioneers and benefactors. Flagler on the east coast and Plant on the gulf coast, are bounding the state with luxurious expense for the benefit of the travelling public. But here in central Florida, among the high pine lands, abounding in health and comfort, is the resort of the masses who seek Florida's best at moderate expense. Thirty-five hours from Boston brought us to St. Augustine, - one night only on the "sleeper," Four hours from St. Augustine brought us here. If any of your readers are thinking of a milder climate for a few weeks, near at their hand, at moderate expense, I can recommend "The Harlan," at Lake Helen, Fla. I am in no way interested in this recommendation, only as I desire to aid others who are looking for such a place at \$12 to \$15 a week, with every facility for enjoyment inside and out. Yours,

Old People.

Old people who require medicine to regulate the bowels and kidneys will find the true remedy in Electric Bitters. This medicine does not stimulate and contains no whiskey nor other intexicant, but acts as a tonic and alterative. It acts mildly upon the stomach and bowels, adding strength and giving tone WHITE ELEPHANT FLOUR. to the organs, thereby aiding nature in the performance of the functions. Electric Bitters is an excellent appetizer and aids digestion. Old people find it exactly what they need. Price fifty cents and \$1.00 per bottle at drug stores of A. A. Tilden, Arlington, and L. G. Babcock, Lexington.

The midwinter number of St. Nicholas opens with a story by the famous traveler, George Kennan, entitled 'A Siberian Scare." Geo. H. Yenowine contributes an article on "The Birthplace of President Lincoln," in which it is incidentally told how a schoolmate saved the future president from death by drowning. Mrs. Julia Taft Bayne writes of "Willie and Tad Lincoln." While the President's sons were living in the White House, Mrs. Bayne's brother "Budd," was their most intimate playmate, and she herself, then a young girl, saw much of them. She tells of their pranks and plays, which included a minstrel show in the White House and a company of zouaves in which all of the members were D. DUNCAN. officers. "The Tale of the discontented Weathercock" and the other serials go

scribed as follows, being situated on the southerly side of Concord street, beginning at a point 350 feet distant from a point opposite to the corner of Concord and Wood streets; thence running southerly and easterly on said Concord street 549 feet; then southwesterly 316 feet on land of Joshua D. Fowle; then southwesterly 553 feet on land of Dudley to the point begin at. The old County road running through said premises being open and used now as a lane for the benefit of said premises and lands eastward thereof. Terms: \$200 at the time of sale; balance in ten days. EAST LEXINGTON LOCALS.

Miss Fannie Kauffmann did not accept the position as a teacher at Somerville, but has accepted one at Franklin.

The four gentlemen from our village who took the trip to North Carolina, are home again, but they report unusually cold weather.

Mr. Edwin B. Worthen will lead the meeting next Sunday evening. There will be good singing. All are welcome at quarter before seven.

Next week on Friday, Feb. 12th, the Friday Club will meet with Mrs. Myron Lawrence, on Pleasant street. Miss Leah Nunn will lead the meeting, Subject,

Rev. George W. Cooke will be absent on the 14th, and will, therefore, give his ninth lecture on the 7th, next Sunday evening. His subject will be "Women in the 17th and 18th Centuries."

Rev. G. W. Cooke lectured Sunday evening on "The Renaissance and the Protestant Reformation." We have only space for a short notice of this interesting lecture. He told us of the fate of the Troubadores and this led to an extreme rebellion against the Catholic church, regarding all externals as unnecessary. Then came the revival of learning,-"The Remaissance,-the result of a movement which brought the Greek classical learning into English. The England found its first expression among the Netherlands, -the every day training the same for women as for men.

The echo of the marriage bells and the sweet perfume of the orange blossoms have been borne on the air to our little village from afar. This week Wednesday afternoon, at the residence of Mr. and Mrs. D. F. Clarke, at North Easton, at 2 p. m., occurred the marriage of their Ernest G. Kauffmann, of East Lexington. The immediate relatives of the families were present at this pleasant home wed- TELEPHONE CONNECTION. ding and they will reside at 38 Joseph of the village.

The Friday Club met with Mrs. George subject being "Current Events." Mrs. Fessenden was the leader and opened the meeting with the reading of some very interesting papers on "Armenia;" then the question was discussed from several points of view. Readings followed by Mrs. Lyman Estabrook on forestry and art, particular mention being made of Abbot Thayer's "Charitas" (charity) in the Art Museum. Mrs. Teel and Mrs. Worthen led us into the Cuban field, which was discussed; Miss Leah Nunn read articles on the new "Textile school" at Lowell, and Miss Brigham on "Vilregretted that members were absent who were to enlighten as on the new in the literary field and the arbitration treaty.

Friday evening a large number assembled at Village Hall, to enjoy the mas- drug stores. querade party. The Clarion Ladies' Orchestra furnished fine music and the party was matronized by Mrs. Caldwell, Mrs. Lawrence, Mrs. Worthen, Miss Grace ening. Leavitt was floor manager and Misses Annie Lawrence, Mattie Stone and Flor- are preparing to hold a sale. ence Kauffmann aids. The Sweetest Things of Earth, What are the sweetest things of earth? A fragrant rose that hides no thern: Riches of gold untouched by scorn: Lips that can praise a rival's worth;

A happy little child askep: Eyes that can smile, though they may weep A brother's cheer, a father's praise; The minstrelsy of summer days:

A heart where anger never burns; A gift that looks for no returns: Wrong's overthrow; pain's swift release; Dark footsteps guided into peace:

The light of love in lover's eyes; Age that is young as well as wise: A mother's kiss, a baby's mirth These are the sweetest things of earth. --Centenary Magazine.

Miss Marvale's Danger.

"But I tell von, Dode, I heard it!" said Bessie Winship, with her blue eyes very wide open.

"You heard your own breath," answered, negligently.

"You know, Dode, my room is the last in this part of the house. Well, I always thought it odd that the folks should be so stiff about the south wing, and I have kept my eyes open to what went on there. I have found out that there certainly is some one up stairs, whom they are keeping sly. I have heard noises from the upper floor, and I have seen both Mr. and Miss Markham go up there. They won't go if they see any one looking, but I have seen them go. Then, yesterday, when I didn't come down to breakfast, I heard after a while a step in the hall and a rattle of dishes, as if some one carrying a tray had stombled. I opened my door, thinking that somebody was bringing me my breakfast, and there was Miss Markham and the old bired man, Jacob, going toward the upper stairs, she carrying a waiter with breakfast and he with a coil of rope in his hand."

Bessie stopped in her low-voiced recital and glanced apprehensively about; but there was no one within hearing. Miss Markham was off attending to household affairs. Mr. Markham was out in the fields mowing with his men, Miss Marvale was sitting under a tree in front of the house, her arms thrown up over her head as she leaned against the great bole, her eyes half shut in some delicious summer reverie; Frank was off trouting and Mr. Alford was in his

Bessie drew a little nearer to me. "I got up very early this morning," she said. "It was hardly light! and must have been about three o'clock. I felt pervous and could not sleep. All night I had been thinking of who and what might be up in that story, and I had got myself into a perfeet fever. I wanted to go to Clara's room, but was afraid of disturbing her, I thought that I would try and find out if she were asleep, and if not I might venture in. I opened my door and looked out, and, glancing up the hali, saw that the door at the foot of the upper stairs was open. I had before thought it was left open at night. Well, frightened as I was, I could't heip creeping along up the hall toward | stay." that door. I trembled least some of them should hear melas I passed their doors, but all was still. But as I came near the stairs I heard a whisper from the upper story. I stopped and list tened, for I dared not go a step nearer and I dared not at first retreat. It seemed to be somey one whispering to himself, for there was only one voice; and no answer. It was an awful whise per, sharp and as though the person wanted to be heard at a distance, but deep-toned, too And, Dode, it said as plain as plain could be, 'I will kill

"Well, what did you do?" I asked "I crept back to Clara's chamber and went in," Bessie said. "She was awake, and I told her the whole story, But you know Clara is cold, though she is splendid. Her theory is that we should never try to find out what people try to keep from us, unless it is more our business than theirs, So, of course, she only cautioned me to go no more beyond our own hall, and to try to think nothing of the matter She was good, though, and let me lock her door and get into bed with her. and when she found that I was really . haking with fear she invented all sorts of plausible explanations to soothe me, Clara is an angel; but the plain fact is, Dode, I am straid."

them! I will kill them!""

I considered. I really was a little impressed by Bessie's story. I had noticed some trifling things which made me think that our host and hostess had trouble on their minds, though I did not doubt their honesty.

"What do you think, Dode?" Bessie asked, after waiting a while.

"I think I don't know anything about the matter," I raid. "Of course we can't pry into their affairs. The best thing to do is to keep quiet, have as good a time as we can and fasten ourselves into our rooms when in rugs. As be heard our steps in the ark (N. J.) Sunday Call.

we go to bed. If you get frightened in the night, just knock on the wall lietween your room and mine, and Frank will go to see what is the mat-

Bessie sighed and remained silent: and at that moment Miss Marvale rose with a languid grace, and sauntered toward the house.

"O, Bessie! have you been telling that story again?" exclaimed Miss Marvale, looking reproachfully at her friend.

"Certainly," said Bessie; "I had no idea of keeping my terrors to myself; and, Clara, they all think more of it than you did. When I scream out in the night I want them to know what is the matter, and if they only half hear me, I don't want them, to turn over and go to sleep, but to start up and think 'that's Bessie being carried off by a burglar or a ghost."

"You must be very careful not to let the family suspect that you think of such things," Miss Marvale said, gravely. "It would be a very poor requital of their courtesy."

"You have no fear, then?" Mr. Alford said, addressing her for the first time that day.

"No!" she answered, quietly looking up to meet his eyes for an in-

I was struck by the expression of their faces. I can only describe it by saying that it was at once inquiring and guarded. The tone and manner of both were quiet and gentle, and even a little softened, but whether it was the self-control which weils diske with a mantle of courtesy, which is all the more scrapulously considerate because it has to be considered, or whether it was that calm mask which covers deep and troubled love, I could

That evening at tea Mr. Alford announced that he should return to the city the next day.

Bessie exclaimed, and so did Frank, but Miss Murvale said not a word, only went on with her supper and never looked up. I saw him look at her and color at the apparent indifference she displayed. But she didn't eat another mouthful of supper, although she trifled with her teaspoon and broke her cake to crumbs.

After tea she went up stairs to her room and stayed there an hour. When she came down we were all out in the mbonlight, walking up and down, Bessie on Mr. Alford's arm, Fred and I with our cigars.

"Clara," Bessie called out, "come and help me coax Mr. Alford to stay another week. Frank says that if he will stay a week longer we might shorten our stay a week, and so go all

Clara Marvale sauntered slowly down the walk, the moonlight full and white on her face and dress.

"I could not hope to succeed where you fail," she said, carelessly, pausing as she met the two. "Besides, I don't see why we should interfere with Mr. Alford's business. If he prefers going immediately, I should not ask him to

There was an awkward silence for a moment, then Mr. Alford proposed that we should all retire, since we were to see him off at six the next morning. But I saw that after we had gone up stairs he went out again, and from the parlor window I heard his step pacing to and fro in the gardens, I wondered if Miss Marvale heard it too. It was one o'clock when he came in and went up to his room. Then I dropped to sleep.

How long I had slept I know not, bat I was awakened by a lond scream that was repeated before I was out of bed. There was a confusion of sounds as I opened our door-Mr. and Miss Markham were coming out of their rooms, the man Jacob was looking from his and Mr. Alford, fully dressed, was standing in the hall.

"What is it?" he asked, for there

was silence. "Where is he?" cried Mr. Markham, ranning down the ball with a light, his gray hair streaming back, his face full of affright, "My God!" he cried, seeing Miss Marvale's door open.

Mr. Aiford was at his side in an instant, and Frank and I followed them into the room. The sight we saw was one calculated

to justify the old man's exclamation. Miss Marvale, in her night dress, with ber hair streaming down ber shoulders was standing against the opposite wall of the room, her face perfectly white, her hands clasped on her bosom and her eyes riveted in a gaze of terror on a man who, haif-crouching, was slowly approaching her, moving softly and warily as a cat, watching her every motion, ready to intercept any step of

This man was evidently of tall and powerful frame, his bair was long, black and shaggy, and his clothes were to people who knew them well. - New-

door he straightened himself up, and turned his face for a backward glance. That one look was enough. The wolfish eyes, the haggard and working face, could only belong to a maniac. This glance was but momentary, for, as we all rushed toward him, he gave a cry, and sprang to grasp Miss Mar-

"I'll finish her!" he cried with a fiendish laugh.

There was not a word said among us, but, as he grasped her, four men were upon him, tearing his hands away from the white throat they had grasped, clasping his own throat with a strong grip, tugging at his waist, tugging at his legs. It took all that we could do, and even then Jacob had added his strength to that of my fingers on the madman's windpipe before he let go his hold. They had a rope and bound him hand and foot, and carried him bowling like a demon away. But as I paused to take breath after letting go my hold, I saw a picture suggestive rather of heaven than hell. Miss Marvale was leaning still against the wall, catching her breath after that half strangling, and standing before her was Mr. Alford, glowing, hesitating.

"Ob, Winthorpe!" she said, stretching her hands out to him.

I heard the full, deep breath he gave as he took a step and gathered her closely to his heart, and then I knew that Winthorpe Alford loved that woman as he loved his life.

There was no more sleep for any of us that night. After a while we all gathered in the parlor, Miss Marvale, dressed and blushing, seated on a sofa with Mr. Alford beside her, and glancing at her every movement with his fond and shining eyes. Bessie had me on one side and Frank on the other, and even then was not sure she might not be carried off. Presently Miss Markham came in and seated herself, facing us all, the gray light of early morning shining in her pale

"We owe you a full explanation," she began, "and an humble apology also. I will make both as short as I can. The man you saw tonight is my brother's only son, John. He has been crazy off and on for years, and his father hated to send him to an asylum. We thought that we could keep him here just as well, and this is the first time he ever broke out. No one knows about him, and we didn't want them to know. Poor John always said that if people knew he had crazy fits they would never trust him. When he has been so the people of Dover have thought that he was always at sea. It wasn't right to take any one into the house; but we made up our minds that John must go to an asylum, and my brother couldn't well afford to send him without sending something to increase his income. I hope you won't think hard of us. We feel badly enough. My brother and Jacob are going to carry him away this morning."

Of course we pitied and assured her, and offered to do anything in our power to help them. Mr. Alford was so happy he was upon the point of telling the distressed lady that the young man's being a maniac had been a most fortunate circumstance for him, when he was interrupted by the sound of their bringing the poor fel-

The rest of us went to the window to see them get into the carriage, but Miss Marvale hung back, covering her eyes from the sight, and her lover leaning toward her, was whispering something that changed her pallor to

A Considerate Dog.

W. A. Halsey tells a neat dog story which he says will be verified by Architect G. A. Staehlin. One breezy morning recently they were riding down Market street upon the rear of a trolley car when the car passed over s nice, light, soft hat, which had blown between the tracks. The hat was not injured, but the wind gave it a little flirt after the car had passed and dropped it fairly upon one of the rails. A big New York car was coming, and shead of it a big mongrel

pointer dog was trotting along. The dog glanced at the hat, looked back at the car, and then, picking up the hat in his teeth, ran over to the curb and deposited it upon the sidewalk near a group of pavers who were working alongside of the court house. After putting the hat in a safe place, the dog loped after the big car and took his place in front of it. Mr. Halsey did not see the owner of the hat nor did Mr. Staehlin, but they passed several remarks about the saacity of the dog, and it is believed that they agreed that it would be better not to speak of the incident except

When the winds of winter beat Little Bunny's hollow tiree. For a blanket round his feet Close his bushy tail tucks he, Never mind how loud the storm, Sound he sleeps and snug and warm. When the little honey beets See the snow come powdering down On their roof beneath the trees, In the pleasant Beehive Town, Then away to bed they ereep. All the winter long they sleep.

But when little busy Ned Hears the noisy north wind blow, Out he rushes with his sled. For he loves the whirling snow, Bees and bunnies, sleepy things Lose the fun that winter brings.

A POOR LITTLE KING.

Of all the boys in the world it is difficult to point out one who is more to be pitied than the little King of Spain. He is a monarch, yet a prisoner. To him freedom of the real boyish sort is a thing anknown. He is the slave of tutors and courtiers. He can do nothing without the solemn approval, beforehand, of his teachers and mentors. The delight of secret raids on the "cookie" far is to him a thing undreamed of; he never knows the joys of pillow tighting, bockey, football or any of the javenile sports that other boys engage in, and his daily life is a dismal routine of lessons, ceremonies and debilitating flummery which every sound-bodied American lad would vote a heartbreaking bore. The little King is a mild-mannered, generous lad who is greatly beloved by those who surround him, but he chafes uniter their restraints and envies the freedom of the other fellows of his own age whose sports he watches from the palace windows. They are the exemplars of liberty, while he, poor little fellow, is only a king!

THE YELLOW DOG LOVES PEACE.

A yellow dog, one of your plain ordinary cars, acted the part of a peacemaker the other day and brought to an abrupt conclusion a schoolboy's

Two lads attending the Haven school on Wabash avenue got into an altercation, and in an incredibly short space of time were pointeling each other in the most approved fashion. It was just at this juncture that the yellow cur appeared. Taking in the situation at a glance, he barked once or twice and in a half dozen bounds came up to the fighting schoolboys. Then he started in to make more fun for the half score of onlookers. First he nipped at the legs of one of the boys and then at the other. It was evident that he did not want to bite hard, for the struggling youngsters did not pay the least attention to his attacks. Suddenly he grabbed the shoe strap of the larger boy's shoe between his teeth and began to pull on it for dear life. The lad reeled and then fell. He had been fairly tripped by the dog.

The other youngster picked up his hat and the fight was over. Seated on his haunches near the curb the yellow dog blinked intelligently at the boys, uttered two or three sharp, joyous yelps and started off toward 14th street, wagging his tail. - Chicago Chronicle.

A DAINTY DOCTOR.

When I was a child, one of the places that I liked to be sent to on an errand, was always "Grandma Baines's," writes Corn Stuart Wheeler. She wasn't my grandmother, nor was she very old. Her eyes were bright and brown, and her soft, round cheeks were rosier than my own; but every one called her "Grandma Baines," and if any one was sick, she was sent for long before a doctor was thought of. To be ready for these sudden calis, which came pretty close together at some sessons, Grandma kept simmering on the back of her kitchen stove. and sometimes in her sitting room, where a small; "air-tight" roared and sputtered out twice as much heat as it could possibly hold, little brown and yellow earthen pots and jars, and a stone vial that Mrs. Baines said was one hundred years old, full of "spring medicines." I was tempted to taste some of them on my first visit, but

never again. My mother's favorite spring tonic was saffron; and I was sent once a week to get a bottle, fresh steeped from Grandma Bames's store of herbs. One morning in late March, as I started out with my saffron bottle. I found two pretty, fragile crocus blossoms that had opened their crisp cups in the cool winds that had delayed the sheltering grasses. I picked them in great delight to take to my dear old lady, who took them not ungently from me, as she said: "Poor children, they are a long way from home."

"No," I cried out; "they only came from our yard.

"Their home is not here, little lass,

she answered, talking more to them than to me, I thought; "the crocus belongs in Greece, where the sun caresses it warmly, and it need not sigh for shelter, but opens gladly, and paints the mountain sides with blue and gold. It was taken to England because it was a useful little plant, as well as pretty; and when Edward the Third was England's king, the crocus gave its name to an English town. In and about this town great quantities of the crocases were cultivated. See, here in the middle of the top, these stamens, like strings or threads-that is the useful part. Great basketsful were gathered when the sun was hottest, by the children and their mothers, and all the pretty blossoms torn apart and thrown away except these little threads.

"The name crocus is from a Greek word meaning thread, or filament, for the only medicinal part of the plant. These threads are dried in great ovens or kilns, then pressed into cakes like

Grandma Baines took from her herb closet one of the packages of saffron that I had so often watched her crumble into a steeping pot of blue glazed

"There!" she said, laughing at my surprise, 'let me put the pretty little doctors in some water while I measure out the prescription which they have ordered for your mamma."

This winter, while I was in Charleston, S. C., I was reminded of my "dainty doctor" by hearing that a very famous scholar of that city was obliged to drink a cup of saffron tea every morning of his life by his wife, who brought it to his bedside and insisted it was good for him, although she never tasted it herself. I think, as the lady was pretty and delicate. that her husband may have liked to take anything brought to bim by his "dainty doctor,"-New York Independent.

Baked Potatoes.

Sir Francis Cruise strongly recommends the use of the sand bath or the common oven for potatoes as preferable to either boiling or steaming, on the ground that a much higher temperature can be used by the first method and a more thorough cooking of the starch grains brought about.

"OLD IRONSIDES."

Famous Old Warship Is Nearly a Hundred Years Old.

Centennial of Its Existence to Be Appropriately Celebrated.

On September 20th next, Old Ironsides, the famous American warship, will round out the first one hundred years of its existence. In order to signalize the event it is likely that, during the present year, the old relic will be overhauled from top to bottom.

Since 1880, or thereabouts, the vessel has been lying in the navy yard at Portsmouth, N. H. Ou account of its historic associations thousands of visitors have yearly thronged its passageways for the purpose of seeing its battered hull and of prving into its enrious mechanism. At the present time, however, the vessel is in a state of menacing decrepitude, and unless something is done at once it is likely to go to pieces.

The movement to overhaul the structure is engineered by such mea as General Horace Porter and Dr. Chauncey M. Depew, who have already secured the passage of a bill through Congress, looking toward the cost of repairs. As soon as the necessary information is obtained, the work of putting the vessel in good order will no doubt begin. When the task is finished the vessel will be removed from its present quarters and anchored in the neighborhood of Washington city. Here it will be preserved as a relic of the nation's first navy.

Old Ironsides was launched on September 20, 1797. Although she carried only forty-four small guus, she was regarded at the time as a marvel of engineering science, and a most dangerous sea monster. On her maiden voyage she was commanded by Captain Nicholson, and the following year joined Commodore Barry's squadron in the West Indies. It was not until 1803, however, that her naval career began in good earnest. In that year she joined Commodore Preble's squadron in the Mediterraneau sea just off the coast of Tripoli, and participated with credit in the fierce naval engagement which followed, although no substantial victory was

Returning home, the vessel figured in no further engagements until the breaking out of the war of 1812. In the second war with England Old Ironsides achieved her first brilliant victory under Captain Isaac Hull. While cruising off the coast of Massachusetts on August 19, 1812, she fell in with the English frigate Guerriere, commanded by Captain James Richard Dacres. In the fight which ensued Old Ironsides lost but seven men, while the English vessel lost fifteen men, besides sixty-two wounded. When the American warship reached Boston with her prisoners she was hailed with bonfires and loud accla-

To review the naval exploits of Old Ironsides would be an endless task. Suffice it to say in this connection that the old warship has written some of the brightest pages of American history, and that as a naval relic, the structure should be preserved. As only a small sum of money will be needed to cover the repairs, it is hoped that our law makers will make the desired appropriation and check the progress of decay which is fast destroying our first American battleship. - Atlanta Constitution.

How an Owl Saved a Train,

Owls are by common consent adjudged birds of ill-omen, but Engineer Ned Barnett of the Santa Fe says he happens to know that they are anything but that, and tells the following story to prove his assertion:

About eight months ago one morning as the east-bound overland was pulling through the mountains west of here, Barnett's engine doing the work, a big horn-beaked owl dashed against the front window of the cab with such force as to break the window, the bird itself dropping dead at the engineer's feet. Though Barnett is not, generally speaking, a superstitious man, this seemed so singular an occurrence that he stopped the train and sent a brakeman ahead to see if the way was clear. Strange to relate, the brakeman soon returned, reporting a landslide across the track in the mountain pass, about 100 yards ahead. Hands were sent at once to clear the track, and in moving the debris they found another owl, no doubt mate to the first, caught in the crotch of an uprooted tree, crushed to death in the

Barnett had both owls stuffed and Many delicate patients can use baked | the two now adorn his cab, always inpotatoes who cannot touch them when suring him good luck, he says. - Philadelphia Times.

HEIRESS AND HOUNDS.

The rosery at Gardenhurst was the fairest spot in all that fair demeane. Over arch and Jattice and trellis the heavy headed blooms rioted in a bewilderment of pink and white, crimson and cream, forming a glorious cauopy above the severely trimmed rosebushes that glowed like gigantic bouquets on either side of the winding

But Enid FitzRoy saw neither the flowers about her, not the surrounding woods, nor the clear summer sky above all. Tall and slender she stood like a statue among the roses, with the folds of her muslin frock falling straightly about her, and her fair face sombre and troubled beneath the wide brim of her garden hat. She was a very pretty girl and should have been | now, as I have said before, I will a very happy one, for happiness ought to be the natural sequence of beauty have me. Dick." and wealth.

The oval of her face that should have been wreathed in smiles was pale and drawn. The small curved mouth was pressed together in an effort to suppress a childlsh desire to cry. The sweet eves were hidden by the white lowered lids in either sorrow or indifference, while the | full-throated birds sang on and the gay roses swang like perfumed ceusers in the light air.

How could she heed or care for birds or flowers, when her whole heart was away in the dim library of the old mansion behind her, when her brain ached in the effort to guess at the words and gestures that were passing | She shook her blonde head. "I there among the frowning family portraits and the great oak bookcases? For at that moment Dick Lindsay was telling his loves and hopes to Lord Hunston, the stern man whom fate had given her for all uncle and guar-

"Hurried footsteps among the roses roused her from her reverie at last, and turning she saw her lover speeding toward her.

"Dick!" she cried, in welcome, running to him and with her set face breaking into joyous smiles. Then a little moan escaped her and she grew white as her gown, for one glance at Dick Lindsay's eves told her he had failed.

"Darling, at first I hoped for success," said Dick, when Enid had regained some degree of self-control and the lovers had wandered from among the jarring flare of the brilliant flower garden in the friendly shadows of the wood. "Your uncle heard me without interruption and even smiled once or twice. I told him of my prospects, how the mortgage was nearly paid off the Knoll, and how I should be able to live there in another year. I referred him to Tapeson and Jenkins that he might verify my statement as to how well the farms were let. I proved to him that I was-financially -in a position to aspire to your hand,

filled with fortune's gift as it is." "And he said " murmured Enid, lifting her tear-washed eyes to Dick's

handsome face. "He said-nothing. That was the worst part of it, Enid. If he had only advanced arguments I might have defeated them; if he had given an opinion I might have challenged it. But he gave me no loophole for speech. He unlocked a small drawer in his bureau-you know, the one that has carved goblins' heads all over it-and pulled out from amid a sheaf of papers one that was folded twice and was tied with tape."

"I know-I know; the copy of my father's will," cried Enid, "made before I was born."

"He opened the paper and pushed it across the bureau to me, marking with a nail dent the passage I should read."

"Oh, don't repeat it, don't say it!" wailed the girl, putting her hands over her ears, as though to shut out hated sounds. 'Don't I know too well that my marriage was fixed for me from the beginning, and that my haps: I heard he had several. Dear father, on his death bed, willed that if | me! how Enid does overdo things to his only and posthamous child should be sure; she's as white as a ghost. be a daughter, she should, on her 21st | She'll look a fright tonight." birthday, be affianced to the only son | And, indeed, as Miss FitzRoy America.

his dearest friend, Lord Errington?

Crueller still, my darling, to orain that if at the date of your maority Lionel Errington were alive and unmarried and you should refuse to become his wife, you should be deprived of your inheritance for five years, and should even not be allowed to live in your own house. Those shameful paragraphs were all my answer. Your uncle then bowed me from the room, only sarcastically begging my presence at your birthday ball next week, during which he intends to annouce your engagement to young Errington."

A hot flush stained Enid's white skin and dried the tears on her cheeks, as she drew herself from Dick's encircling arms and faced him in the clear, then suddenly came to an end, narrow pathway.

"Dick Lindsay, when six months ago I gave you my heart and my love, I gave them for all time, and not to further on. take them back at the written word of a man whom I never knew, who was dead before I lived. On my birthday I will-if needs be-leave Gardenhurst, and go out into the world to eard my livelihood until the time of my probation is overpast. But I say said Lionel sulkily, turning back. marry no man but you-if you will

Her voice, which had rung out so bravely, quivered and broke, and she put out two trembling hands to her lover and crept to his heart like a

As he soothed her the distant roar of a gong thrilled through the quiet

"I must go," sighed the girl. "One more week of this life and theuthen I shall be free. Ah! don't look like that, Dick. I mean what I say. I shall be ready to leave this place in a

"But, Enid, my love, where will you go? What will become of you?" flon't quite know. I must think."

Dick Lindsay fixed his dark eyes intently on her for a moment, as he thought he would read her very soul. 'Dearest, is there any one about you who is trustworthy-who will give you a letter if I write one?"

'Susan Ramsdale, my maid, is honest, and loves me. Send to me through

A moment later Enid's white gown was fluttering over the lawns and tertaces homeward.

Miss FitzRoy's majority was being cciebrated in a truly seigneurial fashion. From early morning the shows and entertainments in the park had been patronized by crowds of friends and tenants. The midday dinner, accompanied by speeches and presentations, was a huge success. In the afternoon the terraces about the house blossomed like a parterre with the light frocks of the "county," who came to witness a bicyching gymkhana, which at the last moment had been organized by the heroine of the The racing was excellent, prizes charming, and all company were bicycle mad when a rumor went round that a paper chase with the beautiful Miss FitzRov as hare would wind up the afternoon's proceedings. The idea was received with delight and Enid might have had 500 hounds instead of fifty to chase her, had she so willed. With pretty obstinacy she persisted herself in choosing the pack, and with infinite taste shared the honors among her friends and tenants alike. But at the last moment she exercised her sex's prerogative and entertained a caprice. She would have a companion hare, a man, and that her choice might not be invidious, she would draw the name of the hare that was to be from among the hounds that were. Pencils and paper and a hat were instantly in de-

"What freaks Enid has, to be sure," said Lady Hunston to her lord, as ploughboys and gentlemen alike dropped the folded papers in the hat Buid held.

'It will be Errington's business to check them," growled his lordship. "Which of the lads is that?" he went as a red-headed yokel slouched past Enid in the immediate wake of the attenuated and mineing Lionel.

One of Wilson's new hands, per-

plunged, her hand into the hat and drew out a scrap of paper, she turned deathly pale. Scarcely glancing at it she said in a low voice, "Isaac Clay."

"Isaac Clay! Who is he?" cried every one, and then a mighty laugh rose from the merry crowd, and even Enid's white lips smiled as the awkward figure of "Wilson's new hand" pushed shyly to the front.

"What a hare! He won't get to lodge gates!" laughed every one, as the bag of torn paper was slung across the lad's back.

"Seven minutes start!" eried Enid, as she sprang into the saddle and sped round the angle of the house with her companion have wobbling after her.

And in that time hounds were after her, amid the cheers of the crowd and sundry minor mishaps. At the lodge gates Lionel Errington-in spite of the white paper going both waysturned sharp to the left.

"Miss FitzRoy won't try Bluebell Hill, I know," he called to those behind him, who were all game for a spin along the flat Clevely Road. For some five miles the paper track was

"It's a trap, of course," said Lionel, who was too warm and was getting cross. "She'll start it again

But "further on" there was no welcome "spore," and eight miles from home, hounds had to confesthemselves baffled.

"If Enid tried the hill at all, it must have been to skake off that lout,'

"But how did the paper come on this road, then?" cried Luly May

She was a pretty little girl but Errington was in too bad a humor to answer her. Yet as he pedalled up to Gardenhurst once more he forced some cheeriness in his voice as he cried, "Hates have won!"

"But where are they?" demanded Lord Hunston.

"Isn't the yokel smashed up?" tittered one fair dame.

"Where's Enid hiding?" cried Lady Hunston, "her bike's not among the

"Has an accident happened?" 'Follow the track down Bluebell

But neither heiress, yokel nor bicycles were found that night, and the than the first.

In a quiet Kensington drawing room that evening sat three people, an old lady, a girl and a young gentleman. On a chair lay a countryman's smock and a carroty wig. The old lady was wiping her eyes; she had laughed Magruder Satolli. He knew, of course, the two young people alone.

"How well you managed," said the girl, smoothing the ruffled hair of her companion.

"And how brave you have been, darling! But was it not lucky I thought of 'papering'the Clevely Road while every one was busy in the

Enid blushed.

"And wasu't it wicked of me not to have read out the real name on the p per I drew," She gave Dick the compled slip.

"Lionel Errington! How that would ave upset our plans," laughed Dick. 'For my aunt would never have received him as she has me-and his name is not on the special license."

Enid smiled and they kissed each other fondly -- Pick Me-Up.

The Horse in History.

The first horse tax in England was established in 1784.

Tattersails, the famous London horse resort, was founded in 1766.

The Newmarket races were founded by James II, in 1667. The skin of the horse is valuable

for both gloves and shoes. The first English riding academy was founded by William III.

In Christian art the horse symbolizes goodness and generosity.

In the reign of Richard III., the use of post horses began in England. The famous Flying Childers in 1744 ran four miles under the saddle

Virgil says that the first driver of a four-in-hand was Erichthonius.

Close observers declare that the horse really sheds tears when grieved. The hoofs and catilages of the horse

make an excellent quality of glue. In the Southern districts of China horseshoes are made of cane or bam-

Abbreviations,

It would be interesting to discover how many readers pronounce abbreviations to themselves. Some very intelligent readers have the queer habit of mentally expanding alibreviations into words and sounds which pever occurred to the abbreviator. An elderly gentleman, well educated, once confessed that he could never see the abbreviation lbs. for pounds without saying "libs" to himself. In like second paper track proved far shorter manner, though an accomplished French scholar, he could never come across such a phrase as "among those present were Messrs, and Mmes. Smith, Blodgett," etc., without saying to himself, "Messers and Meemes." always transformed Jno. into Juno, and always, in the privacy of his own mind, transformed Mgr. Satolli into until she had cried. Presently she left that this practice was absurd, but he had never succeeded in breaking himself of it. - Milwaukee (Wis.) Senti-

Official Salaries in Europe.

The royal family of England costs the British government, in round numbers, \$3,000,000 annually. Of this sum the queen receives nearly \$2,000,000 a year, besides the revenues from the duchy of Lancaster, which

amount to a quarter of a million. The Lord Lieutenant of Ireland receives \$100,000 a year for his services and expenses, and the Prince of Wales \$200,000 a year.

The President of France receives \$240,000 a year for salary and expenses, an enormous salary, when it is remembered that the republic is sweating under a stupendous national debt of over \$6,000,00,000-the largest debt ever incurred by any nation in the world.

Italy can have ten thousand men slaughtered in Abyssinia and still pay her king \$2,600,000 a year.

The civil list of the German emperor is about \$4,000,000 a year, besides large revenues from vast estates be longing to the royal family.

The Czar of all the Russias owns in fee simple 1,000,000 square miles of cultivated land, and enjoys an income of \$12,000,000.

The King of Spain, little Alfonso XIII, if he is of a saving disposition, will be one of the richest sovereigns in Europe when he comes of age. The state allows him \$1,400,000 a year, with an additional \$6,000,000 for

family expenses.

Acres of Lettuce.

John F. Garrell has sixty beds of lettuce under canvas and covering an area of five acres, and the plants are of all sizes and looking splendid. He also has fine beds of young beets and a quantity of cabbages that are thriving well. Our people have no idea of the extensiveness of Mr. Garrell's trucking business and will be surprised to learn that he is the most extensive single individual grower of lettuce in the South. He has been making shipments of lettuce daily for some time and shipped to New York a whole carload of elegantly beaded lettuce. Up to date he has shipped 400 barrels, and we learn that he expects his shipments this season to reach from 8,000 to 10,000 barrels. Wilmington (N. C.) Messenger.

Alaskan Foxes.

There is another important industry in Alaska besides that of seal capture. Commonwealth of Massachusetts.

MIDDLESEX, SS. SUPREME JUDICIAL COURT. Petition of Louisa A. Brine, of Arlington in said County to quiet title to real estate.

Respectfully represents Louisa A. Brine, that she is the owner in fee of the following described real estate, situated in said Arlington.

First. A certain lot or parcel of land, with the buildings thereon, bounded and described as follows: Beginning at the easterly corner of the great road, funning through said town, bow ealled Massachusetts avenue, at laud formerly of Silas Cutter, now of said Brine, your petitioner, and running southwesterly by said land one hundred and eight (108) feet; thence through the land formerly by land formerly ing and running northwesterly by land formerly of Abijah Frist, now of your neutroner, five (a) rods; thence turning and running north-casterly by land formerly of said Frost, now of your petitioner, one hundred and eight (30) feet to said great road, now called Massachu setts avenue; thence turning and running south easterly by said avenue five (5) rods to the point

of beginning. Second. A certain lot or parcel of land containing forty eight hundred and seventy live square feet, bounded as follows: Beginning at easterig corner of premises on Mann street, now called Massachusetts avenue, and running southwesterly by land formerly John Schouler, now of your petitioner, as fence formerly stood, ninety-one (91) feet; thence furning and running more westerly by said hand aix (6) feet; thence turning and running north westerly by said lands, on a line nearly parallel with line of said Main street, fifty (50) feet to a hane, a common passageway; thence turning and running northeasterly by said lane or com-mon passgeway ninety one and one half (91.50) feet to said avenue; thence turning and running southeasterly by said Main street fifty four (34)

feet to the point of beginning.

In the year 183 Abijah Frost conveyed the parcel first above described to Daniel Clark and David Clark, both of Bedford, in said Middlesex County, by deed bearing date Nov. 26, 1833, and recorded with Middlesex So. District

Deeds, book 328 page 260.

That there appears to be no conveyance of said parcel on record from said David Clark to said Daniel Clark and your petitioner is ighor-ant whether any such conveyance was made or, if made, is now in existance; that in the year 1837 said Daniel Clark, claiming to be the sore owner of said parcel first above described, mortgaged the same to Benjamin Locke and others, trustees, by mortgage deed dated feb. 27, 183, and recorded with said deeds, oook 280, page 26, That said benefit for the said deeds. page 256, "That said Daniel Clark conveyed the said parcel first above described to Charles Swan, by deed with full convenants of war-ranty, dated March 28, 1838, and recorded with said deeds, book 381, page 24-12. That said mort-gage so made by said Daniel Clark to said Locke and others, was released to said Swan, December 20, 1844. That said Charles Swan conveyed said parcer first above de-scribed with other adjoining land, including the second parcel herein described, to Joan Scabuler by deed containing full covenants of manty, dated (let, 30, 1847, and recorded with said deeds, book 524, page 60.

In the year 1847 said John Schouler conveyed to Michael Kenney, of West Cambridge, the second parcel of land herein described, by deed dated Oct. 1, 1847, and recorded with said deeds, book 518, page 23. "The said Michael Keaney mortgaged the same back to said Schouler by mortgage deed dated Oct. 1, 1847, and recorded with said deeds, book 518, page 224;" that there appears to be no conveyance of said second par-cel on record from said Michael Kenney other than said mortgage; that the said John Schouler elaiming to be the owner in fec, mortgaged both of said parcels herein above described, to Timothy Swan by deed of mortgage dated June 3, 1853, and recorded with said deeds, book 549, page 475, which mortgage was subsequently discharged. Said John schooler conveyed hota of said parcers with other lands adjoining to Robert Schouler by warranty deed, dated May 19, 1854, and recorded with said deeds, book 578,

page 484. Said Robert Schouler conveyed both of said parcels to William H. Locke, trustee tog the her heirs by inflenture, dated and recorded with said deeds, book 857, page 537, May 8, 1861. Elizabeth Schouler, wife of said Robert, died said Arlington, then West Cambridge, in the year 1867

William H. Locke, trustee, in accordance with said indenture conveyed said parcels with said other adjoining land to David D. Schouler and

land to John C. Hobbs, by deed dated July 20 1880, and recorded with Middlesex So. Dist. Deeds, book 1352, page 77.
Said John ©. Hobbs conveyed both of said

parcels herein above described, with adjoining land, to your petitioner by deed dated April 19, 1885, and recorded with said deeds, book 1699,

Your petitioner says that said Charles Swan since March 28, 1839, been in continuous, open, uninterrupted and adverse possession of both of said parcels first herein above described to the date of this petition; that said John Schuller and those claiming title under him, including your petitioner have, since June, 1853, been in session of said second parcel and also of said first parcel herein above described, to the date of this petition; that owing to the hability of your petitioner to find any record of a conveyance from said David Clark of said parcel first above described, or any evidence of the existance of such conveyance, there is a possibility that said David Clark, or his heirs, assigns or devices, may make some adverse claims to the premises; that owing to the inability of your petitioner to find any record of a conveyance from said Michael Kenney of the equity in and to said second parcel herein above described, or any evidence of such conveyance, there is a possibility that said Michael Kenney or his heirs, assigns or devisees may make some adverse claim to the premises.

Your petitioner further says that she has made diligent effort to find said David Clark and Michael Kenney and has been unable to do so. And is unable after diligent effort to find whether they or either of them be living or dead, or, if dead, the whereabouts of their heirs at law; and there appears to be no admin-istration upon the estates of either of them upon the records of the Probate Court for said County of Middlesex in which they dwelt at the time of e making of the conveyances to them herein above referred to.

Wherefore your petitioner prays that such adverse claimants may be summoned to show cause why they should not bring an action to try their claims against said real estate and that a decree be entered that said adverse claimants, their respective heirs and assigns be for-ever debarred and estopped from having or en-forcing any such claims adversely to your pe-titioner or her heirs and assigns in the premises herein above described.

LOUISA A. BRINE, By J. W. O'Brien, her attorney.

Commonwealth of Massachusetts.

MIDDLESEX, 88. Supreme Judicial Court, December 17th, A. D., 1896,

Supreme Judicial Court, December 14th, M. D., 1896.

Upon the petition aforesaid, it is ordered by the Court that the petitioner notify all persons interested to appear before our Justices of said Court, at Cambridge, in said County, on the first Monday of June next, by causing an attested copy of said petition and of the order of the Court thereon, to be published in the ARLINGTON ADVOCATE, a newspaper published in Arlington, in the County of Middlesex, once a month, for six successive months, the last; publication to be fourteen days at least before the said last mentioned day, that they may then and there show cause, if any they have, why the prayer in said petition set forth should not be granted.

THEO, C. HURD, Clerk.

THEO. C. HURD, Clerk. A true copy of the petition and of the order of Court thereon. Attest: THEO. C. HURD, Clerk.

Continued from 1st page. dainty laces, and pearl trimming on the waist. She carried a boquet of bride roses. The congratulations of relatives and intimate friends of the family present were offered after the ceremony, and then a wedding breakfast was served in the dining room, the table being handsomely set and decorated with a centre piece of flowers. The occasion was eminently social, and a pleasant feature was solo selections rendered by Miss Annie Jewett, of Gloucester, a cousin of the bridegroom. A brief wedding journey will be spent in New York and then the couple will make their home at the spacious residence of the bride's mother. The wedding presents were handsome and numerous, abounding in silver table ware, some exquisite pieces of china painting, beautiful etching and pictures, books, clocks and dainty articles for household use and for ornament.

=Through the generosity of the Arlington Wide-Awake Club, some of the poor children of Hull street, Boston, and its neighborhood, were given a festival at the rooms of the Mutual Helpers, 32 children were served to sandwiches, ice cream and cake, by Mrs. S. A. Fowle, Jr., week which were ideal for sleigh riding and Miss Elsie M. Parker of the Wideand were improved by those owning Awake, which furnished the treat. Rev. mission work and is doing a grand work worthy of sympathy and encouragement from charitably inclined people.

> =The Waltham High team did not show up to play their league game with Arlington High, Tuesday afternoon, at Spy Pond, so Arlington lined up against Cambridge High and Latin and added another victory to their list. Arlington showed that they were easily superior to any high school team in the State and capable of giving the best teams a hard fight to defeat them. The line-up:-
